

Technical committees: Explained

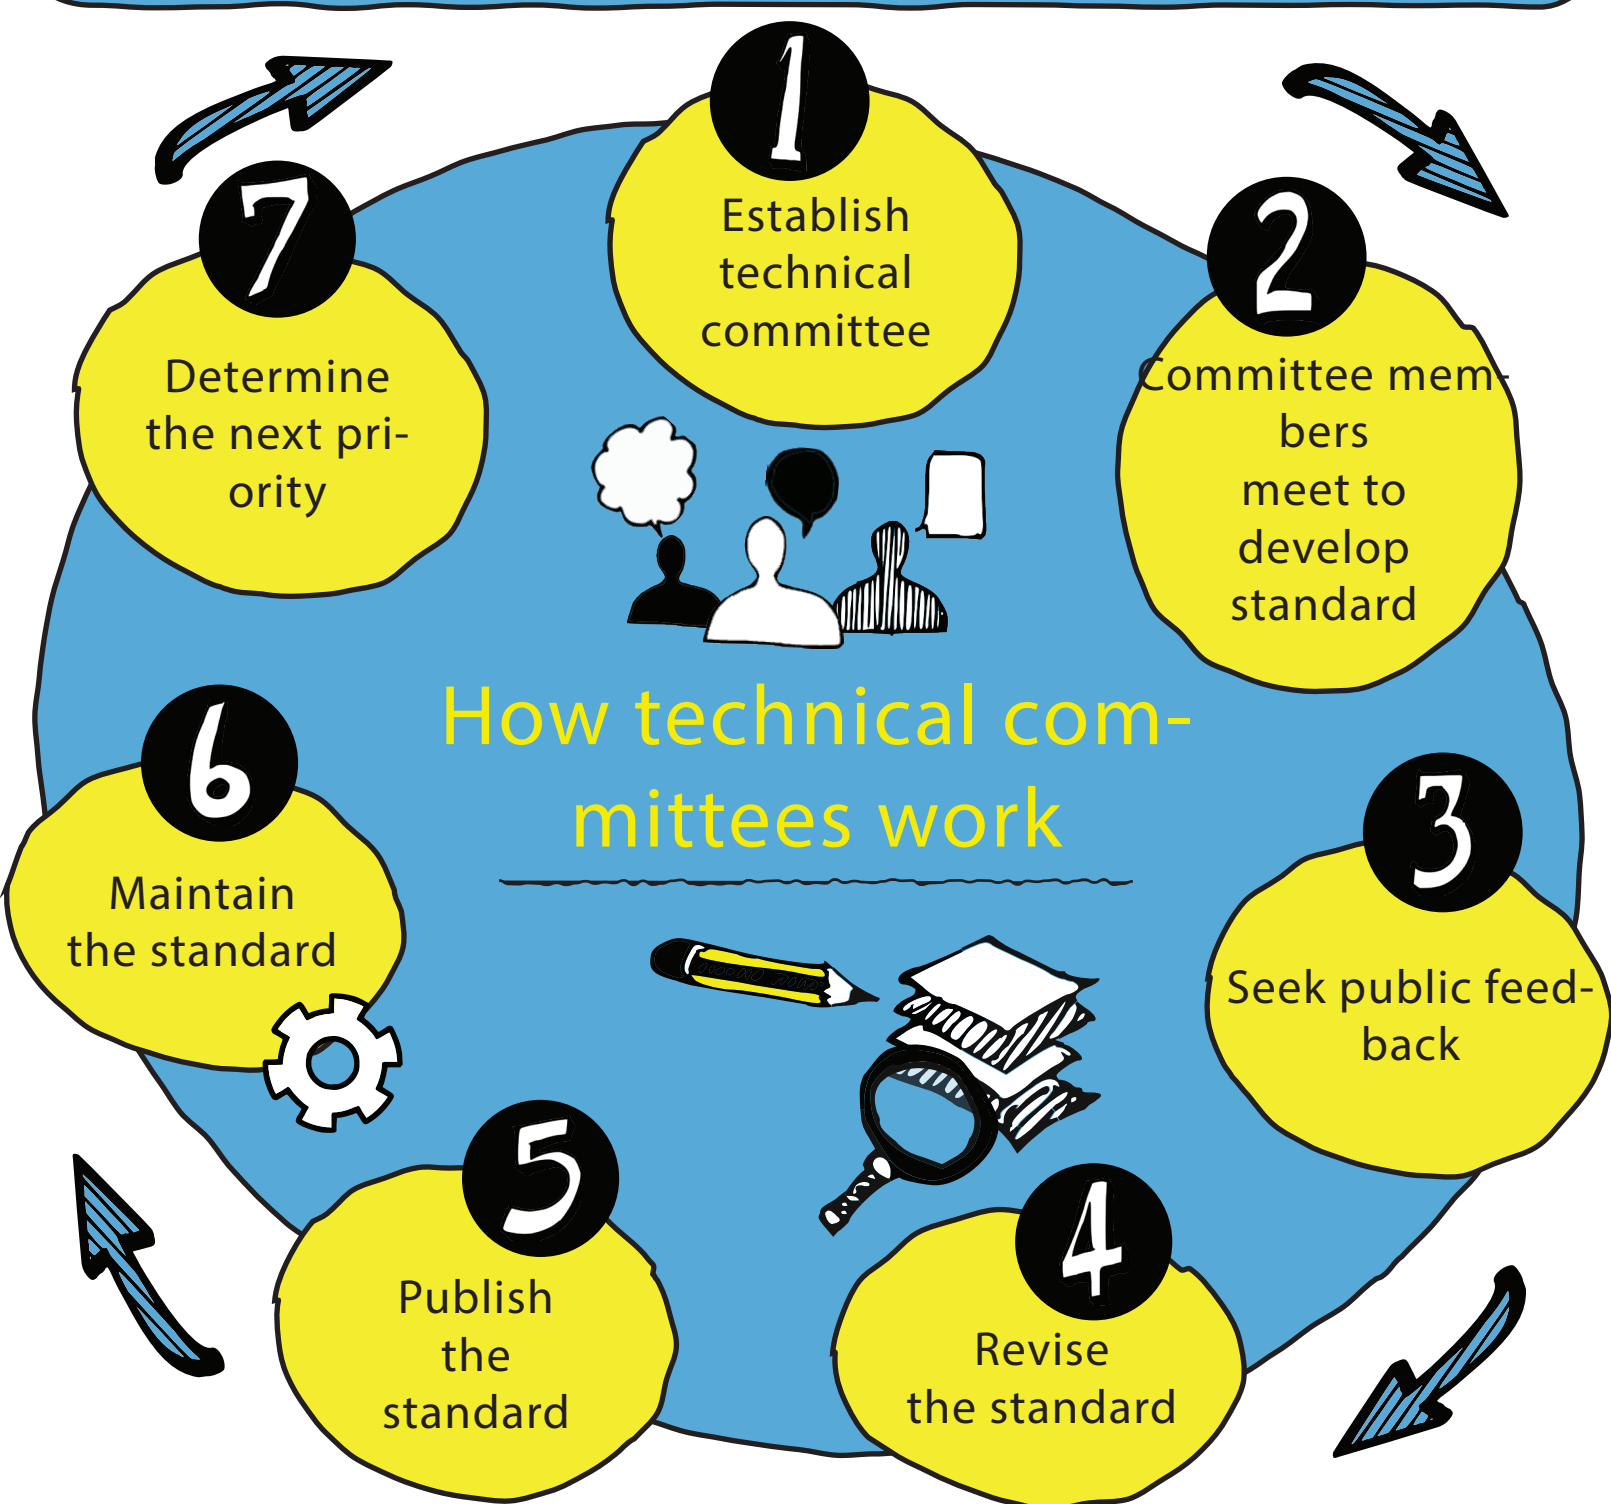

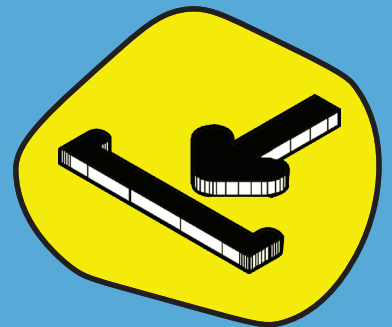

Technical committee:

a group of people from different organizations and backgrounds who combine their expertise and lived experience to solve a problem facing a particular area.

Accessibility Standards

Accessibility Standards Canada's technical committees will:

- ➔ Identify where people with disabilities experience accessibility barriers, and
- ➔ Develop national standards to eliminate these barriers.

Did you know?

The standard development process can take an average of 24 to 30 months to complete.

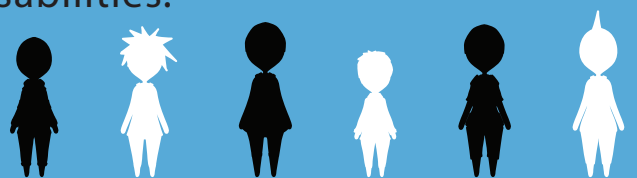

Our grants and contributions program funds accessibility research projects, which inform and help the work of our committees.

Members with disabilities not paid by an organization will be compensated for their roles as experts on our committees.

Standards developed by our committees will impact the lives of the more than 6 million Canadians with disabilities.

Find out about the next opportunity to participate by visiting our website, registering to our newsletter, or following us on social media.
